**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Stop the US Telecom petition and preserve competition.

Telcos are pushing to recreate the monopoly which has been broken in 1984...The Telecom Act of 1996 allowed the Internet to develop and create the digital economy, which is no a core value for the actual economy of our country... Going against the Teleom act is destroying the Internet and is destroying the economy.

Monopolies hamper economy, and they don't make america great again... everybody a little educated understand that.

America has been built on competition and Internet is a key asset, it should not be threatened by telcos or cable operators which have kept their bad attitude... milking the cow by hiking the price and delivering terrible service...The user has no choice..between the bad and the ugly.

The last mile of infrastructure should not be the property of the telco (or cable operators), but it should be accessible at fair stable low price to all competitors offering services the the users...This last mile should be strictly regulated and openly shared.

Keep the competition open, keep the net neutrality and don't allow the telcos to throttle the Internet. Let the competitive internet providers compete openly to offer better services and better prices to the users.
